Overview

Software Engineer with expertise in C# .NET, ASP.NET MVC, React.js, and Android Development, experienced in enterprise systems (ERP, CRM, Finance, Retail). Skilled in full project lifecycle management, automation, AI integrations, and delivering scalable, high-impact solutions.

Experience

- **Software Engineering & Marketing Manager @ Aiems (03/2025 - 02/2026)**
  - **Lead full-cycle web and system development projects from requirements analysis and workflow design to deployment and client delivery.**
  - **Designed and implemented e-commerce platforms and corporate websites, increasing client online engagement by 35%.**
  - **Managed and optimized ERP, CRM, Payroll, Finance, and Retail systems, including database administration and performance tuning.**
  - **Developed CRM mobile applications and conducted end-to-end functional, integration, and black-box testing.**
  - **Built automation workflows using n8n and integrated AI voice systems (VoicHub) to enhance operational efficiency and customer interaction.**
  - **Designed marketing materials, wrote promotional content, and managed social media campaigns, increasing online reach by 40%.**
  - **Solved and resolved 20+ critical system issues, ensuring system stability and business continuity.**
  - **Coordinated directly with clients to gather requirements and ensure 100% alignment with business needs.**
- **Software Engineering @ The Hope The Hope International (02/2022 - 09/2024)**
  - **Led the development of a Hospital Management System using C# .NET, reducing manual operations by 40%.**
  - **Designed and deployed multiple web applications using React.js, improving performance and user engagement by 35%.**
  - **Developed full-featured e-commerce systems, integrating secure payment gateways and Amazon Product APIs.**
  - **Built and optimized SQL Plus databases, improving query performance by 30% while maintaining data integrity.**
  - **Created detailed technical documentation to support maintenance and knowledge transfer.**
  - **Collaborated with cross-functional teams to deliver projects on time and within scope, achieving a 98% delivery success rate.**
- **Software Engineering @ FACT (06/2020 - 01/2022)**
  - **Developed and maintained ASP.NET MVC and C# modules, improving system performance by 25%.**
  - **Enhanced internal information management systems, resulting in 30% faster data processing.**
  - **Built and debugged Android applications using Android Studio, reducing crash rates by 20%.**
  - **Contributed to the Jordan Islamic Bank project, delivering all assigned modules within deadlines.**
  - **Improved code quality through reusable components and clean code practices, increasing team productivity by 15%.**

Education

Bachelor of Software Engineering (2021-2024) Zarqa University , Jordan GPA : Vary Good

Certifications

- **Data Science and Machine Learning with Python (Udemy)**
- **n8n (Udemy)**
- **Asp.Net MVC (The Hope International)**
- **Appian BPM (Udemy)**
- **Project Manager (Udemy)**
- **Agile/Scrum (Udemy)**

Language

- **Arabic: Native**
- **English: Professional Working Proficiency**

Skills

- Web Development: ASP.NET MVC, React.js
- Mobile Development: Android Studio
- Programming Languages: C#, JavaScript
- Database: SQL, SQL Plus, Database Optimization, Query Performance
- Enterprise Systems: ERP, CRM, Payroll, Finance, Retail Systems
- Testing & QA: Functional Testing, Integration Testing, Black-box Testing
- Project Management: Requirement Gathering, Workflow Diagrams, Documentation
- Automation & AI: Workflow Automation (n8n), AI Voice Integration (VoicHub)
- E-commerce Development: Full-stack E-commerce Platforms, Payment Gateway Integration, Amazon Product API Integration
- Marketing & Digital Tools: Social Media Campaigns, Posters & Content Creation

Soft Skills

- Problem Solving: Efficiently identify and resolve technical issues
- Client Communication: Gather requirements and align with client needs
- Project Leadership: Manage projects from planning to delivery
- Team Collaboration: Work effectively with cross-functional teams
- Time Management: Deliver projects on time with high quality
- Adaptability: Quickly learn and apply new technologies
- Attention to Detail: Ensure accuracy in coding, testing, and documentation

Projects

1. Algorithms Visualization System

Technologies: ASP.NET MVC, C#, JavaScript, SQL Server

Description: Interactive educational platform that visualizes sorting and search algorithms step-by-step with performance comparison and a custom sorting algorithm (graduation project).

2. Driver Management & Loading System

Technologies: React, C# .NET, SQLite, Nginx, VPS Hosting

Description: Web system for managing drivers, shipment schedules, and load distribution with React frontend and C# .NET backend, deployed on VPS with custom domain.

3. E-Commerce Perfume Platform

Technologies: React, Django, Python, PostgreSQL, Tap Payment Gateway

Description: Full e-commerce platform for perfumes (Amazon-style) with Tap payment integration and optimizations for high traffic.

4. Retail Management System

Technologies: C# .NET, SQL Server, Barcode Integration, Crystal Reports

Description: System for inventory, sales, and reports with multi-role users (cashier, manager, admin) and barcode support.

5. AI Agent for Customer Interaction

Technologies: Python, NLP/LLM, STT/TTS APIs, PBX Integration

Description: AI agent that responds to customer inquiries via text or voice, collects customer data, and gives context-aware responses.

6. Marketing Strategy Framework

Technologies: Google Analytics, Meta Ads, Email Marketing, Content Management

Description: Detailed marketing plan template for different businesses with a proven ~80% success rate.

7. CRM Mobile App UI

Technologies: Figma, UI/UX Design, Design Systems

Description: Figma UI kit for a CRM with multiple style variants, ready for mobile development handoff.

8. 3D Real Estate & Villa Website

Technologies: Three.js, WebGL, React, 3D Modeling

Description: 3D website for real estate with virtual tours, interactive points, and lighting effects using WebGL.

9. AL-MOHRA Finishing & Decoration Website

Technologies: React, C# .NET, SQL Server, SEO

Description: Corporate site for finishing and decoration services with portfolio gallery, quote form, and bilingual (Arabic/English) support.

10. Transportation Management System

Technologies: React, C# .NET, SQLite, Real-time Notifications

Description: Custom system for a Syrian transport company: driver routes, role distribution, and conflict-free scheduling.

11. International Fleet Bus Rental

Technologies: React, TypeScript, Vite, Tailwind CSS, Shadcn/UI, TanStack Query, React Router

Description: Modern bilingual bus rental site (Rusaifah, Jordan) with dark mode and corporate, domestic, and international trip services.

12. Alternative Energy Summit & Awards 2026

Technologies: React, TypeScript, Vite, Tailwind CSS, Shadcn/UI, Framer Motion, React Router

Description: Conference and awards site for Alternative Energy Summit 2026 in Dubai: agenda, animated stats, sponsors, and registration.

13. Applkanji Company System

Technologies: React, TypeScript, C# .NET, SQL Server, Tailwind CSS

Description: Full-stack company platform with custom design covering all company operations and management modules.

14. Domestic Workers Management System

Technologies: React Native, React, C# .NET, SQL Server, Mobile App

Description: Mobile app for domestic workers and clients with a web dashboard for administration and monitoring.

15. Inventory Management System

Technologies: React Native, React, C# .NET, SQL Server, Barcode Scanner

Description: Inventory system with mobile app for scanning and updates and a web dashboard for tracking, alerts, and multi-warehouse support.

16. Student & Teacher Management System

Technologies: React, C# .NET, SQL Server, Educational Platform

Description: Educational platform where teachers create quizzes and materials, students take them, and admins oversee the syste

17. Portfolio Websites Collection

Technologies: React, TypeScript, Tailwind CSS, Vite, Portfolio Design

Description: Multiple personal portfolio sites for different people with modern, responsive layouts.

18. Ansam Company Website

Technologies: React, TypeScript, Tailwind CSS, Corporate Design

Description: Corporate website for Ansam with company info, services, portfolio, and contact, with a modern design.

19. Multi-Company Accounting System

Technologies: C# .NET, SQL Server, React, Accounting Software

Description: Accounting system for multiple companies (multi-tenant) with full financial management and reporting.

20. Car Garage Management System

Technologies: React, C# .NET, SQL Server, Mobile App

Description: System for car garages: vehicle entry/exit, repair history, parts tracking, and service estimates.

21. Dakakin Baladna Palestinian Event

Technologies: React, TypeScript, Tailwind CSS, Event Website

Description: Event website for “Dakakin Baladna” showcasing local shops, vendors, and event information.
